

As the general public, we are tired of having content mandated to us by the national radio broadcasting industry. Now that we are making a conscious choice to dictate ourselves what we want to hear and how we want to hear that specialized content on a subscription basis (via satellite radio), the same broadcasting industry wants to take that away from us as well. It is absurd that the NAB is trying to fight the satellite radio industry when it directly empowers the general listening audience. As subscribers to satellite radio, we are making the choice and it should not be the NAB's.
